Summary

Computer Science graduate with a PG Diploma in Advanced Computing and hands-on experience in full-stack development using MERN and .NET technologies. Skilled in building scalable web applications and REST APIs with React, Node.js, ASP.NET Core, and SQL. Strong problem-solving ability with a solid foundation in data structures and real-world project development.

Education

IMS Engineering College, Ghaziabad

July 2024

Bachelor in Technology (Computer Science)

IET CDAC Pune

PG Diploma in Advanced Computing

feb 25- aug 25

Experience

TECHNO FUNNEL INFOTECH PVT LTD.

July 2023 – august

Full Stack Developer using MERN

This Full Stack Developer (MERN) internship offers hands-on experience frontend(React), backend(Node.js, Express), MongoDB, version control, and collaborative development in a dynamic tech company.

Skills

Languages: Python, C, C++, Java, C#(.NET Core).

Frameworks: React.js, Redux, Bootstrap, Spring Boot, ASP.NET Core.

Frontend : HTML5, CSS3, JavaScript(ES6+).

Databases : MYSQL, MSSQL.

Cloud & Operating System: AWS, Linux

Testing & Development : Selenium, SDLC (Agile), REST API Development.

Version Control Tools : Git, GitHub.

Tools & Platforms : Visual Studio 2022(Developer), VS Code, Eclipse, Jira.

Soft skills: Teamwork, Problem-Solving, Emotional intelligence Time management, Decision-making.

Projects

Housing Hub

- Developed a full-stack society management app using .NET 8, C#, React, MS SQL, Docker, and Azure.
- Built wing/flat management, expense allocation, JWT auth, role-based access, and real-time workflows (complaints, visitors, amenities).

Journey Planner

- It is used for finding best route, shortest path, minimum cost for any distance.
- Used BFS, Kaggle, Dijkstra's algorithm and C++ to build intuitive user interfaces, ensuring increased customer satisfaction.

E- Commerce for shoes

- This E- commerce webapp allows shoes businesses of all type to create and manage their own stores.
- Used Redux, React , CSS for frontend, node js., Express js., for backend and mongoDB for database.

Virtual Voice Assistant

- The project aims to develop a private assistant for Computer like Google assistant and Siri.
- It built mainly using python.

Certification

- Completed the course on Programming for everybody Python by Coursera.
- Completed the Data Structures and Algorithms course by Coding Ninjas.
- TPC Global for completing 80 hour of a training program on Employ-ability Skills
